

# ConSlitter

Duplex slitter

# ConSlitter CFRU SilverLine

### Technical Data

<b>Materials</b> Films, refined papers, laminates	<b>Parent roll diameters</b> 1,000 mm	<b>Slitting widths</b> ≥ 25 mm
<b>Material thickness</b> 10 - 500 µm	<b>Finished roll diameters</b> max. 610 mm	<b>Winding cores</b> 70 mm · 3" · 6"
<b>Material widths</b> 1,450 · 1,750 mm	<b>Finished roll weights</b> max. 400 kg (feature-dependent)	<b>Machine speed</b> max. 600 m/min
<b>Slitting systems</b> Blade cut · scissor cut		

Efficiency. A definite strength of the ConSlitter.

### Wide range of equipment options.

**For perfect slitting and rewinding results:**

- Splicing table
- Scissor or blade cut
- Digital positioning aid for scissor cut
- Friction or expansion shaft operation
- Antistatic equipment
- Eccentric contact rolls

**For high efficiency:**

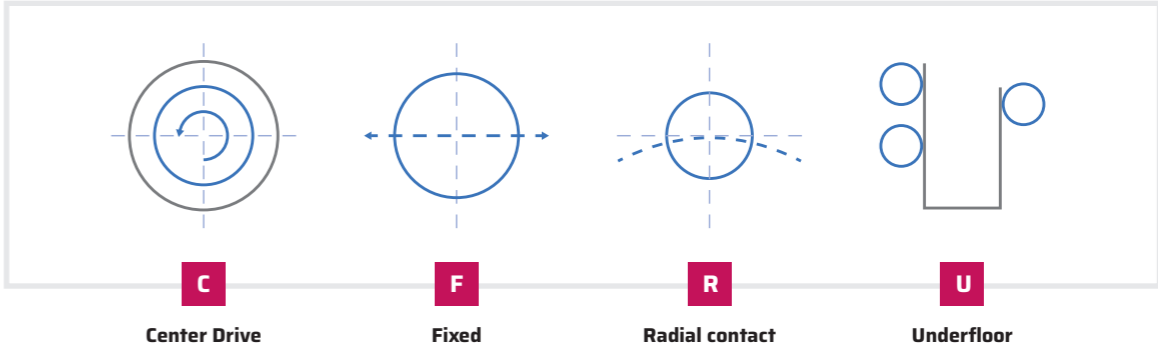

- Laser core positioning aid
- Finished rewind roll push-off device
- Various rewind roll removal stands
- Edge trim suction

## Compact but comprehensive. Manifold applications.

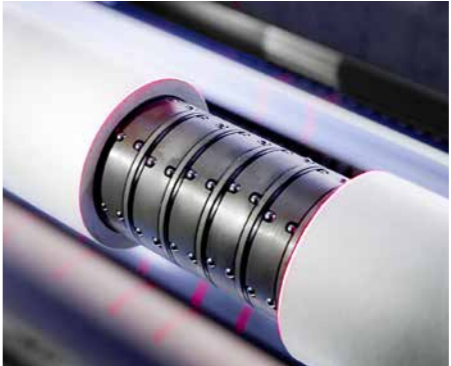

Do you need a slitter rewinder that can process a variety of materials and is not too complex to operate? The ConSlitter CFRU SilverLine is the reliable and economic solution for your slitting needs.

With speeds up to 600 m/min at 2 different working widths, unwind diameter up to 1,000 mm and rewind diameter up to 610 mm the machine offers a comprehensive slitting and winding solution.

You can select from a flexible modular system so that the machine can be equipped exactly to meet your requirements!

**Scissor cut**  
For best quality with long service life.

**Rewind**  
Short machine set-up times, precise adjustment, perfect finished rolls.

**Splicing table**  
High-quality splices made simple.
